- Scheduling Flexibility**
  - One working day in advance booking.
  - An inspector onsite within 24 hours.
  - Same day inspection result.
  - Reports provided within 24 hours of completion.

**WHAT IS OUR SOLUTION?**

 <p><b>Pre-Production Inspection (PPI)</b></p> <p>PPI is to have random inspection of the material and component before mass production. It is help to be sure the quality of in-coming materials.</p>	 <p><b>Final Random Inspection (FRI)</b></p> <p>FRI is to have quality control of your order. It normally required the production to be 100% complete and at least 30% of goods packed into cartons. The checked samples are randomly selected according to ISO 2859 standard.</p>	 <p><b>During Production Inspection (DPI)</b></p> <p>DPI is to check the product early on in- production scheme and make sure that they conform to the your standards. You will receive daily report of the production and completion status. Apart from random sampling, PPI inspection focus on Workstation workmanship, On line quality control &amp; Stocking.</p>
 <p><b>Factory Audit Services</b></p> <p>Factory Audits is the best way to evaluate our potential supplier. You may have a full picture of your supplier's capabilities, quality control system, management and operating procedures.</p>	 <p><b>Container Loading Supervision (CLS)</b></p> <p>CLS is a critical step of delivery. The inspector witness the loading of product process to verify the carton quantity, product loaded with care instructions. UTS takes steps to steps to helps you out at the last stage of quality control.</p>	 <p><b>Laboratory Testing</b></p> <p>UTS testing services cover variety of products and standards, one stop service form laboratory testing to on-site inspection. Ensure your product compliance on global market.</p>
